DIAMOND INFORMATION FACT LABELS

Apply to diamond papers for quick and exact reference to the grade of the stones. The two-fold labels have both views of a diamond table up and table down for plotting inclusions, carbon and other identifying features. Self-adhesive label has a chart for listing weight, clarity, color, dimension, comments and price. Label kits contain one pack of each shape.

EILUX WATCH WINDERS

- Sophisticated, electronic instruments that keep watches fully wound even when not worn on owners' wrists.
- Eliminates need for constant rewinding.
- Prevent "pooling of oil" inside watch after its internal mechanism is restarted. (*"Pooling" not only affects a watch's accuracy but also significantly shortens its service life.*)
- Restricts flow of essential lubricants to all moving parts.
- Incorporates advanced solid-state microprocessor, which controls rotating super-metal conductor engine at heart of all automatic watches.
- Ensures plentiful supply of oil to all moving parts of watch at all times.
- Delivers unparalleled levels of accuracy and service life.

Unique antibacterial watch attachment design

Prevents the build-up of harmful moisture and mold in watches' innerworkings and on leather watch straps and metal bands.

Ultra-long 12 months battery life

Specially designed Power Conserve Circuits result in a battery life of up to three times longer than conventional designs.

Super-quiet operation

EILUX watch winders run so silently, owners almost forget they are on.

Ultra-sophisticated Super-Metal Conductor Motor

Ensures optimal winding performance and watch durability.

Solid, precision-grade construction

High performance, shock-resistant, stable winding motions and laser-calibrated rotor alignments mean our winders provide owners with optimal winding angles for their watches.
